—— **Your influence deserves more**

SEPOCH Platform Token-Mining Issue

Equity

- ❖ Everyone has equal opportunity and the mining requires KYC passed certification
- ❖ Mining limit time for each account is 24 hours

Transparency

- All the mining details and repurchase funds of the SEPOX are displayed in real time

Community consensus

- ❖ The circulation of each token is determined by the SEPOX miner community
- ❖ The final circulation will be determined by community's consensus

SEPOX Token mining mode details

Total mining tokens

199872000 SEPOX Tokens (Sepoch Exchange Tokens)

➢ The actual total circulation of SEPOX tokens will be determined by the mining capacity of the community's miners
➢ Unmined SEPOX tokens will be directly destroyed
➢ SEPOCH destroys dividends every quarter, eventually making SEPOX tokens in the secondary market circulate 21 million

Produces one block per minute

With a 24-hour 1440 block as a cycle

➢ Each block has 100 SEPOX tokens, and each miner can only dig a maximum of one block every 24 hours
➢ The amount of refined SEPOX in each block is determined by the miners ($0 \leq X \leq 100$)
➢ Each block must not share mining with other accounts
➢ Unmined blocks and SEPOX tokens will be directly destroyed every minute

Mining hash rate increases every 24 hours

+1% (Based on the previous day)

SEPOX Token mining mode details

Total mining days

1388 days

- ➤ If the newly produced mining pool is unmanned, it will be abandoned

Repurchase mode

The SEPOCH exchange has set up a mining repurchase fund. At any time, any miner can sell SEPOX coins to the SEPOCH platform according to the current mining power

- ➤ Repurchase funds = mining funds
- ➤ Repurchase SEPOX token price = mining power on the day
- ➤ When the repurchase fund is used up, people can not repurchase, however the mining mode will still continue, and the underpinning repurchase fund can be opened again while the mining restarts

Trading market

At 07:00 on February 5th, 2020 (GMT), SEPOCH will open SEPOX token Trading pair on the market

ERC-20 Token

SEPOX tokens are issued based on Ethereum smart contracts. All mining miners can withdraw tokens and transfer them to cryptocurrency wallets at any time, such as: BitPie, Jaxx, etc.

Mining invitation mechanism

Participate in mining and reward USDT

Rebate 10% of the invitee's mining quota

1. Can only be used for mining, the returned USDT is injected into a specific frozen account
2. You need to cooperate with the same amount of real USDT investment quota for mining, how much USDT is injected to use the same amount of USDT to return USDT
3. Rewarded mining USDT is not included in the mining fund pool

USDT Reward

SEPOX Token Values

Exchange Token

1. As the official platform token of the SEPOCH exchange, it has the function of obtaining certain rights and interests on the platform

Repurchase Mode

1. Unique repurchase mechanism protects the interests of investors
2. The value of platform tokens has a stable range

Token for SEPOCH activities

1. SEPOCH official Token airdrop event
2. SEPOCH Stars Network Community Participation Token

SEPOX Token notion

No pre-mining, no pre-sale, no private sale, no Lock-up period
- ➤ All obtained through mining
- ➤ Does not accept any investment

100% repurchase guarantee mechanism
- ➤ The SEPOCH platform uses the entire mining funds as a repurchase funding pool
- ➤ Repurchase funds pool will ensure investment benefits for miners
- ➤ Underlying secondary market price bottom line

Miners determine circulation
- ➤ Currently 100% of the trading platform tokens on the market are determined by the platform
- ➤ SEPOCH as the world's first exchange that determines the issuance of platform tokens by miners
- ➤ Unmanned blocks will be directly discarded and will not be circulated

Multiple applications
- ➤ SEPOCH Exchange platform Token
- ➤ SEPOCH Stars Network Token
